

WHAT IS CLAIMED IS:

1. An organization information recording apparatus for recording organization structures which are formed by combining a plurality of acting organization objects comprising:
 - 5 an acting organization object recording unit for individually recording said acting organization objects which equip with an input information, an output information, an auxiliary input information, and an auxiliary output information as properties; and
 - an acting organization object mode designating unit including an input information designating unit, an output information designating unit, an auxiliary input information designating unit, and an auxiliary output information designating unit for setting property of a specified object recorded in said acting organization object recording unit.
- 15 2. The organization information recording apparatus as cited in claim 1, wherein either said input information and said auxiliary input information, or said output information or said auxiliary output information are made exchangeable regarding properties relating to said input information, said output information, said auxiliary input information, and said auxiliary output information.
- 20 3. An organization information recording apparatus for recording organization structures which are formed by combining a plurality of acting organization objects comprising:
 - 25 an acting organization object recording unit for individually recording said acting organization objects which equip with an input information, and auxiliary input information; and
 - an acting organization object mode designating unit including an input information designating unit, and an auxiliary input information designating unit for setting property of a specified object recorded in said acting organization object recording unit.

4. An organization information recording apparatus for recording organization structures which are formed by combining a plurality of acting organization objects comprising:

an acting organization object recording unit for individually recording said
5 acting organization objects which equip with an output information, and auxiliary
output information; and

an acting organization object mode designating unit including an output
information designating unit, and an auxiliary output information designating unit for
setting property of a specified object recorded in said acting organization object
10 recording unit.

5. An organization information analysis apparatus for analyzing an organization
which is expressed by combining a plurality of acting organization objects comprising:

an acting organization object recording unit for individually recording said
15 acting organization objects which equip with an input information, an output
information, an auxiliary input information, and an auxiliary output information as
properties;

an acting organization object mode designating unit including an input
information designating unit, an output information designating unit, an auxiliary input
20 information designating unit, and an auxiliary output information designating unit for
setting property of a specified object recorded in said acting organization object
recording unit; and

an acting organization object analyzing unit for analyzing a performance
relating to a combination of a plurality of acting organization objects in accordance with
25 the relation between input information property and an output information property
based on the objects recorded in said acting organization object recording unit.

6. An organization information analysis apparatus for analyzing organization
which are expressed by combining a plurality of acting organization objects comprising:

an acting organization object recording unit for individually recording said
30 acting organization objects which equip with an input information, and an auxiliary

input information as properties;

an acting organization object mode designating unit including an input information designating unit and an auxiliary input information designating unit for setting property of a specified object recorded in said acting organization object recording unit; and

an acting organization object analyzing unit for analyzing a performance relating to a combination of a plurality of acting organization objects in accordance with the input information property based on the objects recorded in said acting organization object recording unit.

10

7. An organization information analysis apparatus for analyzing organization which are expressed by combining a plurality of acting organization objects comprising:

an acting organization object recording unit for individually recording said acting organization objects which equip with an output information, and an auxiliary output information as properties;

an acting organization object mode designating unit including an output information designating unit and an auxiliary output information designating unit for setting property of a specified object recorded in said acting organization object recording unit; and

20

an acting organization object analyzing unit for analyzing a performance relating to a combination of a plurality of acting organization objects in accordance with the output information property based on the objects recorded in said acting organization object recording unit.

25

8. The organization information analysis apparatus as cited any one of claim 5, claim 6, and claim 7, wherein

said acting organization object equips with an activity contents property expressing contents of activity;

30

said acting organization analyzing unit carries out a link appropriateness inspection with regard to a plurality of acting organization object obtained based on the properties of said acting organization object.

9. A computer program which functions a computer as the organization information recording apparatus as cited in any one of claims 1 to 4.

5 10. A computer program which functions a computer as the organization information analysis apparatus as cited in any one of claims 5 to 8.

11. A recording medium to which said computer program as cited claim 9 or claim 10 is recorded.

10
